EXPERIENCE

Junior Developer   Aug 2023 - Present
Digital Web Solutions Pvt. Ltd.   *Gurugram, Haryana*

- Developed multiple web pages incorporating both frontend and backend components, showcasing versatility in full-stack development.

- Developed multiple SEO tools aimed at enhancing the search engine optimization (SEO) of web pages, contributing to improved visibility and ranking on search engine results pages (SERPs).

- Integrated various APIs seamlessly to fetch real-time data, enhancing user experience and interactivity.

- Received positive feedback from stakeholders for delivering high-quality, feature-rich web pages with dynamic content and real-time updates.

- Conducted regular performance optimization and debugging sessions to maintain and enhance the speed, reliability, and security of web applications, ensuring a smooth user experience.

PROJECTS

Property Listing Page: Developed dynamic property listing page integrating external APIs, delivering real-time data updates for enhanced user experience. (Website Link)

Web Scrapper: Designed and implemented a robust tool utilizing PHP web scraping techniques coupled with advanced JavaScript to extract heading tags and paragraph content dynamically from web pages. (Check it Out)

Keyword Density Checker: Created a powerful tool to analyze keyword density by counting the occurrence of words on a website, generating a comprehensive table displaying the top 20 most frequently appearing words. (Check it Out)

Campsite: Created a responsive web app with HTML5, CSS3, EJS, and JavaScript. Integrated Express JS and Node JS for backend, MongoDB for data storage, and utilized Node packages for enhanced functionality. (Check it Out)

Get Header Info: Created a comprehensive tool to retrieve header data, providing detailed insights into various header information for enhanced website analysis and optimization efforts. (Check it Out)
